2 SKETCH YOUR SPACE FROM THE TOP

Measure your walls, then use the grid to sketch out your space from a top view. See the reverse side for examples.

1 Square = 1 Square Foot

Record your measurements for each wall in the form to the right of the grid.

SKETCH YOUR SPACE FROM THE SIDE

Transfer your measurements from step 2 to the grids below to show your space from the side (the shaded area represent 6 ft. of FLOW WALL™

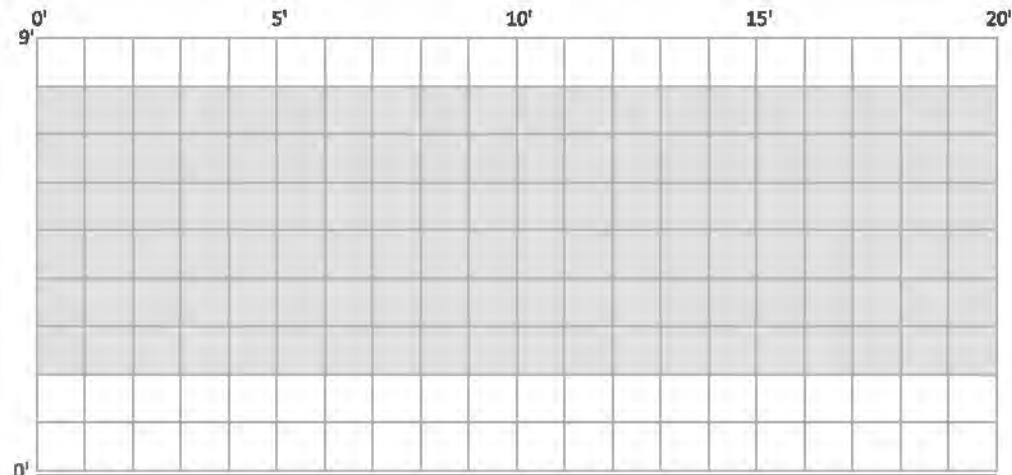

Panels across a 9 ft. high wall). Next, sketch in any obstacles, using some common types shown above. Count the number of squares you've outlined for wall panels to calculate the number of square feet you will need.

4 CUT OUT FLOW PRODUCTS

We included drawings below of our largest products. Use these as guides to draw over your space plan. You can also cut these line drawings out

and arrange them onto your plan. Start with panels first, and load them up with our many storage options. Don't forget to give us a call or e-mail if you need any assistance. We are here to help!

Wall Panels

Use 48" x 12" or 96" x 12" panels as the building block for your system.

Cabinets

Cut out individual cabinets to paste into place over your sketches wall panels.

Configure Your Panels

Flowwall Panels can be configured in many ways. These examples show just some of the possibilities for a 24 sq/ft panel pack. You can also split up a panel pack to create more than one storage zone.

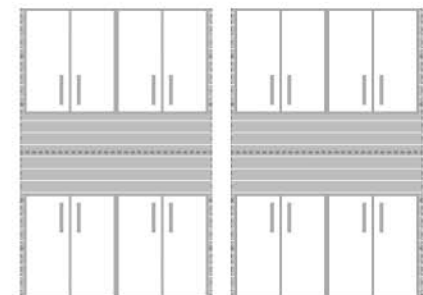

Cabinets

Not sure where to start? Try one of our pre-configured Cabinet Bundles. Combine bundles, or build your own custom setup.
